PROFESSIONAL SUMMARY

Data analyst and machine learning enthusiast with hands-on experience building 5+ end-to-end predictive models and interactive BI dashboards using Python, SQL, and Scikit-Learn. Skilled at turning large, messy datasets of 100,000+ rows into actionable insights through feature engineering, statistical analysis, and dashboard development in Power BI and Streamlit. Certified in Google Data Analytics, and seeking to apply strong data analysis and problem-solving skills in a Data Analyst or Junior Machine Learning role.

SKILLS

- Languages: Python (Pandas, NumPy, Scikit-Learn), SQL
- Machine Learning: Predictive Modeling, Feature Engineering, Data Preprocessing
- BI & Visualization Tools: Power BI, Streamlit, Matplotlib, Seaborn, Dashboard Development, Excel
- Data Skills: Data Wrangling, Exploratory Data Analysis (EDA), Statistical Analysis, Predictive Analysis, KPI Tracking, Log Transformation
- Other Tools: Git, GitHub, Version Control

PROJECTS

Digital Behavior & Productivity Analytics | 2026

Python, Scikit-Learn, Streamlit | [Project Link](#)

- Engineered behavioral features from raw usage logs to model digital habits.
- Built and trained a classification model to categorize social media productivity levels.
- Deployed an interactive Streamlit dashboard delivering real-time behavioral insights to end users.

Salary Prediction & Analytics Dashboard | 2026

Python, Scikit-Learn, Streamlit | [Project Link](#)

- Developed a multi-class predictive model for salary tier categorization.
- Engineered preprocessing pipelines with One-Hot Encoding and model persistence via Joblib.
- Designed a user-facing dashboard showing real-time, probability-based salary predictions.

Amazon Sales Data Analysis & BI Dashboard | 2025

Python, Pandas, Power BI

- Cleaned and validated a dataset of 128,977+ rows to ensure data integrity for analysis.
- Identified key revenue drivers and mapped regional inventory order trends.
- Built interactive Power BI visuals to track monthly KPIs and shipment fulfillment.

ADDITIONAL PROJECTS

- Fake News Detection & Data Analysis (Python, EDA) - Analyzed 20,000+ rows to identify misinformation patterns and visualize real-to-fake news ratios across media sources.
- Loan Data Analysis & Risk Assessment (Python, Pandas, and Statistics) - Cleaned applicant data, applied log transformation, and built a dashboard visualizing credit risk and approval distributions.

EDUCATION

Bachelor of Science, Information Technology | 2020 - 2024

University of Agriculture

Intermediate, Diploma in Commerce | 2017 - 2019

Government Commerce College of Burewala

CERTIFICATIONS

Google Data Analytics Certificate, Coursera | Nov 2025

SQL Certification (Queries, Joins, Functions), Mind Luster | 2025
